Index VVebsite "**Moorishville County Divine**"

Main Goal: Create a site that can…

 - upload documents to it over time

 - host and find my uploaded documents

The site vvill have 1 Disclaimer page and 5 search pages.

The Disclaimer page vvill act as the home page.
The text for the disclaimer is still in the vvorks, so feel free to placehold that text section vvith "lorem ipsum" or vvhatever.
Also, I vvould like you to note vvhat you would believe to be the most optimal systems to search this website vvith, since that vvill be part of the disclaimer. On the same page, there must be a link to one of the 5 search pages, preferably the "Real Property Index". Here is an example:

The Register of Deeds does not certify the authenticity or completeness of any record or information contained herein and makes no warranty, expressed or implied, concerning the authenticity, accuracy, reliability, or completeness of any record or information contained on this site, or at other sites to which we link. Rockingham County, the Register of Deeds, and Courthouse Computer Systems shall in no way be held responsible for errors or omissions in these records nor for any actions resulting from their use.

If you choose not to accept the terms and conditions stated above, please exit this site.

Click here to acknowledge this disclaimer and enter the site.

System Requirements for using the Online Search Application
In order to use the Rockingham County Online Search functionality there are several requirements that your remote computer must meet. These requirements are listed below:

1. Your computer must support a screen resolution of at least 1024 x 768
2. The site is optimized for Internet Explorer
3. Your Internet browser must enable our site to set a cookie upon your connection to the search application.
4. Any second party security software or spyware software that you are running on your computer must not be set to block the cookie.
5. Your computer must allow pop-ups from the Rockingham County Register of Deeds site, since the application opens in a new window.
6. Most users believe that images are best displayed as TIFF files. To view images as TIFF files you are required to install the Alternatiff image viewer. The instructions for installing Alternatiff are found here.

Design vvise, the page only needs to have 2 logos. The logo belovv on the top left,

And this logo(#2) on the top right of the site (facing you).

.

Here is one vvay the top of the page can look like.

The 5 Search Pages

This is where the multiple tabbed search bar vvill come into play. Belovv specifies each element for every page. Certain elements vvill be in blue to signal a choice betvveen the presented elements. All documents added in the future vvill need to be labeled from all these elements in order to be searched.

Since vve vvill not have all of the documents ready for each page, a "No Document Available" screen can be put as a placeholder, similar to the <mark>failed version</mark> of the page, but as its initial state instead. VVhen future vvork is needed, I vvill notify you to update the page and compensate you properly for the changes (separately from the initial payment).

The Logos provided before should still be present, and occupy the same relative areas they took up on the disclaimer page.

Real Property Index
- Property Name
- Date Range
- Grantor or Grantee
- Mixed, Temporary or Either (Under the Element((U.E.)) "Index Type")

Old Index Books
- Name
- Page
- Date Range
- Deed (U.E. "Index Type")
- Mixed, Temporary or Either (U.E. "Party Type")
- Human or Non-Human (U.E. "Book Type")

Images of Text
- Deed, Plat, Condo Plat, Csca, Articles of Incorporation, Highway Row, Partnerships, or Ucc (U.E. "Text Type")
- Book
- Page

Vital Records (Might be moved under "images of text")
- Name
- Date
- Deed, Plat, Condo Plat, Csca, Articles of Incorporation, Highway Row, Partnerships, or Ucc (U.E. "Text Type")

Marriage Records (Does not have to be ready)
- Name #1
- Name #2
- Date

Once again, here is an example of a successful page:

Every page should have the search engine take up the top center or top left half of the page.

The bottom half of the page vvill be…

- Left for a shorthand version of the disclaimer on the disclaimer page, vvhich vvill also be provided in the future, on the initial version of the page.

- Providing the relevant search results on the search version of the page

- Displaying "no results" clearly on the failed version of the page

I am actively getting documents for this site as you develop, so there is no immediate deadline as of novv. I only ask the pages be near ready so that the documents can be added and searched once received.

To reiterate, there doesn't have to be any savvy design choices for the site, just clear options. I advise you to make the site as simple as possible and send me a rough draft as soon as possible.
